LEATHER & FABRIC INFORMATION	
SPECIAL FABRICS	By default, Special Fabrics are only available on toss cushions, lounge chairs, and small ottomans. Please inquire with us if pricing is not listed, and/or if Special Fabrics would like to be specified on other pieces.
ECO LEATHER	Microfiber leather, is the highest grade synthetic leather, a high-tech simulation of high-end leather products. Microfiber Leather is simulated the structure of natural leather, using sea-island superfine micro fiber, (ultra-fine fiber bundle), and high-grade polyurethane resins as raw materials, using needel punched nonwoven technology of 3D structure. It has a lot of similar characters as natural leather, however better physical & chemical performance
SEMI ANILINE LEATHER	Semi Aniline Leather is produced through a very similar process to Full Aniline, but has a thin protective top coat added to protect it from wear and staining.
FULL ANILINE LEATHER	Aniline Leather is a type of leather dyed exclusively with soluable dyes without covering the surface with a topcoat paint or insoluble pigments. The resulting product retains the hide's natural surface with the grain, (i.e. visible pores, scars, complete original animal's skin structure).
